ECO LASER
-It`s in the air-

IT'S IN THE AIR

PURE OXYGEN

The air all around us contains 21 % oxygen. With the right technology this oxygen can be reliably extracted and purified for medical use. At Eco Laser we are experts on this technology, pressure swing adsorption (PSA).

Our on-site oxygen generators are reliable cost efficient and environmentally friendly source of pure oxygen.

”

Our company has been in the gas generator business for almost 20 years, and during that time we've perfected the PSA technology for demanding medical use.

Our oxygen generator system is modular and can be tailored to every clients specific needs. It's also very straightforward to expand the system later.

- Eco Laser CEO Rauno Hakala

Oxygen generator benefits

- Fully automated and reliable operation
- Quick return on investment (< 1 year)
- Overall cost reduction up to 90 %, no on-going costs
- No safety risks of handling high pressure gas cylinders
- No rust contamination to patient`s lungs
- Built to client`s exact specifications in Finland
- Minimize your carbon footprint
